## **Programming Entity Framework: Code First: Creating and Configuring Data Models from Your Classes** Julia Lerman, Rowan Miller

Take advantage of the Code First data modeling approach in ADO.NET Entity Framework, and learn how to build and configure a model based on existing classes in your business domain. With this concise book, you'll work hands-on with examples to learn how Code First can create an in-memory model and database by default, and how you can exert more control over the model through further configuration.

Code First provides an alternative to the database first and model first approaches to the Entity Data Model. Learn the benefits of defining your model with code, whether you're working with an existing database or building one from scratch. If you work with Visual Studio and understand database management basics, this book is for you.

- Learn exactly what Code First does—and does not—enable you to do
- Understand how property attributes, relationships, and database mappings are inferred from your classes by Code First
- Use Data Annotations and the Fluent API to configure the Code First data model
- Perform advanced techniques, such as controlling the database schema and overriding the default model caching

This book is a continuation of author Julia Lerman's *Programming Entity Framework*, widely recognized as the leading book on the topic.

### **From reader reviews:**

#### **Frances Norman:**

The book titled Programming Entity Framework: Code First: Creating and Configuring Data Models from Your Classes is the reserve that recommended to you to read. You can see the quality of the publication content that will be shown to anyone. The language that author use to explained their ideas are easily to understand. The writer was did a lot of analysis when write the book, therefore the information that they share to you personally is absolutely accurate. You also will get the e-book of Programming Entity Framework: Code First: Creating and Configuring Data Models from Your Classes from the publisher to make you far more enjoy free time.

#### **Shannon Harvey:**

A lot of people always spent their own free time to vacation or go to the outside with them family members or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you need to try to find a new activity this is look different you can read a book. It is really fun for you personally. If you enjoy the book which you read you can spent the whole day to reading a e-book. The book Programming Entity Framework: Code First: Creating and Configuring Data Models from Your Classes it is very good to read. There are a lot of people who recommended this book. They were enjoying reading this book. In case you did not have enough space to deliver this book you can buy often the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not to cover but this book features high quality.

#### **Henry Woods:**

Programming Entity Framework: Code First: Creating and Configuring Data Models from Your Classes can be one of your basic books that are good idea. Most of us recommend that straight away because this reserve has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to place every word into satisfaction arrangement in writing Programming Entity Framework: Code First: Creating and Configuring Data Models from Your Classes although doesn't forget the main level, giving the reader the hottest and based confirm resource data that maybe you can be one of it. This great information can certainly drawn you into brand-new stage of crucial contemplating.

#### **Marilyn Calhoun:**

Reading a reserve make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is composed or printed or descriptive from each source this filled update of news. In this modern era like currently, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or

just seeking the Programming Entity Framework: Code First: Creating and Configuring Data Models from Your Classes when you necessary it?
