## Trees and Forests - A Color Guide: Biology, Pathology, Propagation, Silviculture, Surgery, Biomes, Ecology, Conservation

Trees are a dominant feature of life on earth, and yet are under severe threat. The aim of this timely volume is to gather together aspects of trees, forests, their development, environments and ecology that are usually considered separately. Chapters deal with various world habitats, ranging from northern coniferous forests to tropical rainforests. Topics include tree morphology, diseases and pests, forest ecology, management, surgery, propagation and conservation. Concise text is illustrated throughout by color photos, diagrams and summary tables.

*Trees and Forests?A Color Guide* is designed to appeal to professionals and students in plant science, plant biology, ecology and conservation, to those working in forestry and arboriculture and to interested non-specialist readers.

- Includes ecology and conservation, tree anatomy and evolution, pathology, silviculture, propagation and surgery
- Chapters cover trees from all different habitats around the world
- Highest quality of color photos
