**BIOMATH: Problem Solving for Biology Students** Robert W. Keck, Richard R. Patterson

This problem-solving supplement teaches biology students the mathematical concepts they need to succeed in their introductory biology courses. Problems, 250 in all, are organized according to topics in a typical biology course, but may be covered in any order. Instructors can either incorporate the biological maths problems into their courses or ask students to use the booklet as a self-study tool. \*250 problems apply to all aspects of introductory biology\*The majority of problems require maths skills at the secondary school level; e.g., conversion of units, algebra, logarithms, graphing, and the geometry of circles, spheres, and cylinders\*Answers to all problems are included at the back of the book
