Evolutionary Games in Natural, Social, and Virtual Worlds Daniel Friedman, Barry Sinervo
Over the last 25 years, evolutionary game theory has grown with theoretical contributions from the disciplines of mathematics, economics, computer science and biology. It is now ripe for applications. In this book, Daniel Friedman---an economist trained in mathematics---and Barry Sinervo---a biologist trained in mathematics---offer the first unified account of evolutionary game theory aimed at applied researchers. They show how to use a single set of tools to build useful models for three different worlds: the natural world studied by biologists; the social world studied by anthropologists, economists, political scientists and others; and the virtual world built by computer scientists and engineers.

The first six chapters offer an accessible introduction to core concepts of evolutionary game theory. These include fitness, replicator dynamics, sexual dynamics, memes and genes, single and multiple population games, Nash equilibrium and evolutionarily stable states, noisy best response and other adaptive processes, the Price equation, and cellular automata. The material connects evolutionary game theory with classic population genetic models, and also with classical game theory. Notably, these chapters also show how to estimate payoff and choice parameters from the data.

The last eight chapters present exemplary game theory applications. These include a new coevolutionary predator-prey learning model extending rock-paper-scissors; models that use human subject laboratory data to estimate learning dynamics; new approaches to plastic strategies and life cycle strategies, including estimates for male elephant seals; a comparison of machine learning techniques for preserving diversity to those seen in the natural world; analyses of congestion in traffic networks (either internet or highways) and the "price of anarchy"; environmental and trade policy analysis based on evolutionary games; the evolution of cooperation; and speciation. As an aid for instruction, a web site provides downloadable computational tools written in the R programming language, Matlab, Mathematica and Excel.

From reader reviews:

Yvonne Wagner:

Now a day those who Living in the era everywhere everything reachable by connect to the internet and the resources inside can be true or not involve people to be aware of each info they get. How a lot more to be smart in having any information nowadays? Of course the solution is reading a book. Studying a book can help persons out of this uncertainty Information particularly this Evolutionary Games in Natural, Social, and Virtual Worlds book as this book offers you rich details and knowledge. Of course the data in this book hundred percent guarantees there is no doubt in it you probably know this.

Rhonda Yowell:

Are you kind of occupied person, only have 10 or even 15 minute in your day time to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are receiving problem with the book than can satisfy your small amount of time to read it because this time you only find e-book that need more time to be study. Evolutionary Games in Natural, Social, and Virtual Worlds can be your answer since it can be read by you actually who have those short free time problems.

Peggy Elmore:

You may spend your free time to see this book this publication. This Evolutionary Games in Natural, Social, and Virtual Worlds is simple to develop you can read it in the area, in the beach, train along with soon. If you did not possess much space to bring the particular printed book, you can buy typically the e-book. It is make you easier to read it. You can save the actual book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Sheila Messina:

This Evolutionary Games in Natural, Social, and Virtual Worlds is fresh way for you who has curiosity to look for some information since it relief your hunger of knowledge. Getting deeper you upon it getting knowledge more you know or you who still having tiny amount of digest in reading this Evolutionary Games in Natural, Social, and Virtual Worlds can be the light food for you personally because the information inside this specific book is easy to get simply by anyone. These books produce itself in the form that is reachable by anyone, yeah I mean in the e-book type. People who think that in e-book form make them feel drowsy even dizzy this book is the answer.
