## Custom Motorcycle Fabrication: Materials, Welding, Lathe & Mill Work, Chassis Assembly (Wolfgang Publications) Tim Remus, Paul Wideman, Steve "Brewdude" Garn

Owner of Bare Knuckle Choppers and long time motorcycle builder and fabricator, Paul Wideman is the perfect author for this book. With experience as both a hands-on builder and technical editor for *Cycle Source Magazine*, Paul has exactly the skill-set needed to write a book on fabrication.

Paul starts at the beginning, with a discussion of the materials commonly used to fabricate custom motorcycle frames, fenders, brackets and all the rest. This discussion includes not only steel but also aluminum and stainless.

Joining metal - welding - is an essential part of building almost anything and the copy here includes, TIG and MIG welding, as well as Stick and Oxy/Acetylene welding. In each case, Paul covers sub topics like penetration, strength, getting started and the relative size of the heat-affected-zone.

Most custom motorcycle frames, as well as many of the brackets that hold things together, are made from tubing. Thus the book includes an entire section on bending and notching tubing to achieve a precise fit between any two parts prior to welding.

The other skill a good fabricator needs is machining on both a mill and lathe. Paul walks the reader through the basics for both types of machining: set up, cutting speed and tools, lubrication and cooling, and safety.

Some commonly fabricated parts like handle bars and exhaust systems are covered as separate topics, along with sections on building simple brackets and mounts.

### **From reader reviews:**

#### **Frances Carlton:**

This Custom Motorcycle Fabrication: Materials, Welding, Lathe & Mill Work, Chassis Assembly (Wolfgang Publications) is great guide for you because the content which can be full of information for you who also always deal with world and still have to make decision every minute. This specific book reveal it data accurately using great plan word or we can say no rambling sentences in it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but difficult core information with attractive delivering sentences. Having Custom Motorcycle Fabrication: Materials, Welding, Lathe & Mill Work, Chassis Assembly (Wolfgang Publications) in your hand like finding the world in your arm, info in it is not ridiculous just one. We can say that no book that offer you world inside ten or fifteen minute right but this e-book already do that. So , it is good reading book. Heya Mr. and Mrs. stressful do you still doubt that?

#### **Ann Davis:**

In this period of time globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. The particular book that recommended to you personally is Custom Motorcycle Fabrication: Materials, Welding, Lathe & Mill Work, Chassis Assembly (Wolfgang Publications) this publication consist a lot of the information on the condition of this world now. This book was represented just how can the world has grown up. The language styles that writer use for explain it is easy to understand. The actual writer made some exploration when he makes this book. Here is why this book acceptable all of you.

#### **Clair Lemanski:**

Do you like reading a book? Confuse to looking for your chosen book? Or your book seemed to be rare? Why so many question for the book? But any people feel that they enjoy regarding reading. Some people likes reading through, not only science book but additionally novel and Custom Motorcycle Fabrication: Materials, Welding, Lathe & Mill Work, Chassis Assembly (Wolfgang Publications) or perhaps others sources were given information for you. After you know how the great a book, you feel desire to read more and more. Science publication was created for teacher or maybe students especially. Those ebooks are helping them to put their knowledge. In some other case, beside science reserve, any other book likes Custom Motorcycle Fabrication: Materials, Welding, Lathe & Mill Work, Chassis Assembly (Wolfgang Publications) to make your spare time more colorful. Many types of book like this one.

**Nancy Sobel:**

Reading a guide make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is written or printed or outlined from each source which filled update of news. In this modern era like right now, many ways to get information are available for a person. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just seeking the Custom Motorcycle Fabrication: Materials, Welding, Lathe & Mill Work, Chassis Assembly (Wolfgang Publications) when you needed it?
