Planning and Management of Lakes and Reservoirs: An Integrated Approach to Eutrophication

United Nations Environmental Programme

This book is the result of the participation of 26 experts involved with the management of freshwater resources from Africa, Europe, North and South America, Asia and Oceania. Their experiences on the causes and possible ways to prevent eutrophication have been assembled here. While this publication is not intended to be a technical manual on how to prevent or solve the problem of eutrophication, it does provide a comprehensive view of the essential components and processes to address the issue effectively.
