The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books)

Timothy P. Hanusa

The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books) Timothy P. Hanusa

The first seven metals in the periodic table are lithium, beryllium, sodium, magnesium, aluminium, potassium and calcium, known collectively as the “lightest metals”. The growing uses of these seven elements are enmeshing them ever more firmly into critical areas of 21st century technology, including energy storage, catalysis, and various applications of nanoscience.

This volume provides comprehensive coverage of the fundamentals and recent advances in the science and technology of the lightest metals. Opening chapters of the book describe major physical and chemical properties of the metals, their occurrence and issues of long-term availability. The book goes on to discuss a broad range of chemical features, including low oxidation state chemistry, organometallics, metal-centered NMR spectroscopy, and cation- π interactions. Current and emerging applications of the metals are presented, including lithium-ion battery technology, hydrogen storage chemistry, superconductor materials, transparent ceramics, nano-enhanced catalysis, and research into photosynthesis and photoelectrochemical cells.

The content from this book will be added online to the *Encyclopedia of Inorganic and Bioinorganic Chemistry*: <http://www.wileyonlinelibrary.com/ref/eibc>

From reader reviews:

Michael Jackson:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each guide has different aim or goal; it means that publication has different type. Some people sense enjoy to spend their the perfect time to read a book. They are really reading whatever they get because their hobby is usually reading a book. Consider the person who don't like studying a book? Sometime, man or woman feel need book when they found difficult problem or perhaps exercise. Well, probably you'll have this The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books).

Frank Bullard:

The feeling that you get from The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books) is the more deep you searching the information that hide inside words the more you get thinking about reading it. It doesn't mean that this book is hard to know but The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books) giving you joy feeling of reading. The copy writer conveys their point in selected way that can be understood by anyone who read the item because the author of this publication is well-known enough. That book also makes your vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this particular The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books) instantly.

Jeffrey Messina:

Precisely why? Because this The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will jolt you with the secret that inside. Reading this book alongside it was fantastic author who else write the book in such remarkable way makes the content interior easier to understand, entertaining way but still convey the meaning fully. So , it is good for you because of not hesitating having this any longer or you going to regret it. This book will give you a lot of gains than the other book have got such as help improving your skill and your critical thinking method. So , still want to hesitate having that book? If I were you I will go to the reserve store hurriedly.

Doris Stone:

Does one one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't ascertain book by its protect may doesn't work the following is difficult job because you are scared that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer could be The Lightest Metals: Science and Technology from Lithium to Calcium (EIC Books) why because the amazing cover that make you consider in regards to the

content will not disappoint an individual. The inside or content will be fantastic as the outside or cover. Your reading sixth sense will directly assist you to pick up this book.
