Topology and Geometric Group Theory: Ohio State University, Columbus, USA, 2010-2011 (Springer Proceedings in Mathematics & Statistics)

This book presents articles at the interface of two active areas of research: classical topology and the relatively new field of geometric group theory. It includes two long survey articles, one on proofs of the Farrell–Jones conjectures, and the other on ends of spaces and groups. In 2010–2011, Ohio State University (OSU) hosted a special year in topology and geometric group theory. Over the course of the year, there were seminars, workshops, short weekend conferences, and a major conference out of which this book resulted.

Four other research articles complement these surveys, making this book ideal for graduate students and established mathematicians interested in entering this area of research.

From reader reviews:

Nathan Herr:

In this 21st centuries, people become competitive in each and every way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that sometimes many people have underestimated this for a while is reading. That's why, by reading a guide your ability to survive boost then having chance to endure than other is high. For you personally who want to start reading some sort of book, we give you that Topology and Geometric Group Theory: Ohio State University, Columbus, USA, 2010-2011 (Springer Proceedings in Mathematics & Statistics) book as beginner and daily reading publication. Why, because this book is greater than just a book.

Lise Callicoat:

Reading a book can be one of a lot of action that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new facts. When you read a publication you will get new information because book is one of several ways to share the information as well as their idea. Second, looking at a book will make an individual more imaginative. When you looking at a book especially hype book the author will bring that you imagine the story how the characters do it anything. Third, you may share your knowledge to some others. When you read this Topology and Geometric Group Theory: Ohio State University, Columbus, USA, 2010-2011 (Springer Proceedings in Mathematics & Statistics), you may tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire average, make them reading a e-book.

Bonnie Howe:

Within this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple approach to have that. What you are related is just spending your time little but quite enough to get a look at some books. On the list of books in the top listing in your reading list will be Topology and Geometric Group Theory: Ohio State University, Columbus, USA, 2010-2011 (Springer Proceedings in Mathematics & Statistics). This book which can be qualified as The Hungry Hills can get you closer in getting precious person. By looking up and review this e-book you can get many advantages.

Lee Villegas:

Reserve is one of source of information. We can add our expertise from it. Not only for students but in addition native or citizen need book to know the up-date information of year for you to year. As we know those guides have many advantages. Beside many of us add our knowledge, may also bring us to around the world. By the book Topology and Geometric Group Theory: Ohio State University, Columbus, USA, 2010-2011 (Springer Proceedings in Mathematics & Statistics) we can have more advantage. Don't you to

definitely be creative people? Being creative person must choose to read a book. Only choose the best book that suited with your aim. Don't end up being doubt to change your life at this time book Topology and Geometric Group Theory: Ohio State University, Columbus, USA, 2010-2011 (Springer Proceedings in Mathematics & Statistics). You can more desirable than now.
