180 Days of Problem Solving for Kindergarten (180 Days of Practice) Jessica Hathaway

The 180 Days of Problem Solving for Grade K offers daily problem solving practice geared towards developing the critical thinking skills needed to approach complex problems. This teacher-friendly resource provides thematic units that connect to a standards-based skill that Kindergarten students are expected to know to advance to the next level. Lesson plans offer guidance and support for every day of the week, outlining strategies and activities that dig deeper than routine word problems. Each week students will use visual representations and analyze different types of word problems (including non-routine, multi-step, higher thinking problems). This comprehensive resource builds critical thinking skills and connects to national and state standards.

About Shell Education

Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.
