Henry E. Dudeney

Amusements in Mathematics (Dover Recreational Math) Henry E. Dudeney
The legion of H. E. Dudeney fans needs no introduction to the first American edition of this endlessly entertaining and instructive volume of mathematical amusements. New readers will be delighted with the 430 puzzles, problems, paradoxes, and brain-teasers presented by a master of mathematical ingenuity. Virtually every sort of mathematical or logical poser is included in this extraordinary collection — problems concerning the manipulation of numbers; unicursal and route problems; moving counter puzzles; locomotion and speed problems; measuring, weighing, and packing problems; clock puzzles; combination and group problems. Greek Cross puzzles, problems involving the dissection or superimposition of plane figures, points and lines problems, joiner's problems, and crossing river problems severely test the geometrical and topological imagination. Chessboard problems, involving the dissection of the board or the placement or movement of pieces, age and kinship problems, algebraical and numerical problems, magic squares and strips, mazes, puzzle games, and problems concerning games will give you an unparalled opportunity to exercise your logical, as well as your mathematical agility.
Each problem is presented with Dudeney's unique urbane wit and sense of paradox, and each is provided with a clearly-written solution — and often with an amusing and instructive discussion of how others tried to attack it and failed. Most of the problems are original creations — but Dudeney has also included many age-old puzzlers for which he has discovered new, surprising, and usually simpler, solutions.
"Not only an amusement but a revelation ... "— THE SPECTATOR.
"The best miscellaneous collection of the kind ..."— NATURE.

From reader reviews:

Irene Howe:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each publication has different aim or perhaps goal; it means that e-book has different type. Some people truly feel enjoy to spend their time to read a book. They can be reading whatever they take because their hobby will be reading a book. Consider the person who don't like reading a book? Sometime, man feel need book once they found difficult problem or maybe exercise. Well, probably you will need this Amusements in Mathematics (Dover Recreational Math).

Curt Hall:

As people who live in the modest era should be up-date about what going on or data even knowledge to make these keep up with the era that is certainly always change and advance. Some of you maybe will certainly update themselves by reading books. It is a good choice to suit your needs but the problems coming to a person is you don't know which one you should start with. This Amusements in Mathematics (Dover Recreational Math) is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

Alyson Ward:

Information is provisions for anyone to get better life, information presently can get by anyone from everywhere. The information can be a expertise or any news even a problem. What people must be consider any time those information which is from the former life are hard to be find than now is taking seriously which one is suitable to believe or which one typically the resource are convinced. If you find the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen in you if you take Amusements in Mathematics (Dover Recreational Math) as the daily resource information.

Anne Braden:

Are you kind of occupied person, only have 10 or maybe 15 minute in your moment to upgrading your mind ability or thinking skill also analytical thinking? Then you have problem with the book as compared to can satisfy your short period of time to read it because this all time you only find book that need more time to be study. Amusements in Mathematics (Dover Recreational Math) can be your answer because it can be read by you actually who have those short time problems.
