Compiled by two experts in Reproductive Medicine, with contributions from internationally respected specialists, this innovative text lets the whole team in Reproductive Medicine get literally on the same page. Taking a cook-book approach to the operational procedures in the laboratory and in the clinic, it details what needs to be prepared in advance, what needs to be prepared earlier the same day, and what steps to take before, during, and after the procedure itself. This is an essential tool for ensuring all staff - whether experienced or starters - can be confident in their tasks and are in touch with what is expected of them and their colleagues.
