Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks

Harry G. Perros

Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks Harry G. Perros

A thorough knowledge of modern connection-oriented networks is essential to understanding the current and near-future state of networking.

This book provides a complete overview of connection-oriented networks, discussing both packet-switched and circuit-switched networks, which, though seemingly different, share common networking principles. It details the history and development of such networks, and defines their terminology and architecture, before progressing to aspects such as signaling and standards. There is inclusive coverage of SONET/SDH, ATM networks, Multi-Protocol Label Switching (MPLS), optical networks, access networks and voice over ATM and MPLS.

Connection-oriented Networks:

- * Provides in-depth, systematic coverage of several connection-oriented networks in a single volume
- * Explains topics such as the Generic Framing Procedure, Label Distribution Protocols, Wavelength Routing Optical Networks, Optical Burst Switching, and Access Networks in detail
- * Illustrates all concepts with problems and simulation projects to test and deepen your understanding
- * Includes an accompanying website with solutions manual and complete set of PowerPoint presentations for each chapter

Senior undergraduate and graduate students in telecommunication and networking courses, as well as networking engineers, will find this comprehensive guide to connection-oriented packet-switched and circuit-switched networks useful for their training. The book presents tried and tested material based on an existing, successful course.

From reader reviews:

Donald Hidalgo:

The publication untitled Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks is the publication that recommended to you to see. You can see the quality of the publication content that will be shown to you. The language that creator use to explained their ideas are easily to understand. The author was did a lot of study when write the book, so the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks from the publisher to make you a lot more enjoy free time.

Edward Emory:

Playing with family in a very park, coming to see the ocean world or hanging out with buddies is thing that usually you may have done when you have spare time, after that why you don't try factor that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks, you are able to enjoy both. It is fine combination right, you still want to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't buy it, oh come on its named reading friends.

Michael Jones:

That e-book can make you to feel relax. That book Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks was colorful and of course has pictures around. As we know that book Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks has many kinds or style. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore , not at all of book are generally make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading that.

Karen Schanz:

A lot of publication has printed but it is different. You can get it by net on social media. You can choose the top book for you, science, amusing, novel, or whatever by means of searching from it. It is named of book Connection-Oriented Networks: SONET/SDH, ATM, MPLS and Optical Networks. You can contribute your knowledge by it. Without leaving the printed book, it could add your knowledge and make anyone happier to read. It is most significant that, you must aware about reserve. It can bring you from one location to other place.
