## Underground Pipeline Corrosion (Series in Metals and Surface Engineering)

Underground pipelines transporting liquid petroleum products and natural gas are critical components of civil infrastructure, making corrosion prevention an essential part of asset-protection strategy. *Underground Pipeline Corrosion* provides a basic understanding of the problems associated with corrosion detection and mitigation, and of the state of the art in corrosion prevention.

The topics covered in part one include: basic principles for corrosion in underground pipelines, AC-induced corrosion of underground pipelines, significance of corrosion in onshore oil and gas pipelines, numerical simulations for cathodic protection of pipelines, and use of corrosion inhibitors in managing corrosion in underground pipelines. The methods described in part two for detecting corrosion in underground pipelines include: magnetic flux leakage, close interval potential surveys (CIS/CIPS), Pearson surveys, in-line inspection, and use of both electrochemical and optical probes. While the emphasis is on pipelines transporting fossil fuels, the concepts apply as well to metallic pipes for delivery of water and other liquids.

*Underground Pipeline Corrosion* is a comprehensive resource for corrosion, materials, chemical, petroleum, and civil engineers constructing or managing both onshore and offshore pipeline assets; professionals in steel and coating companies; and academic researchers and professors with an interest in corrosion and pipeline engineering.

- Reviews the causes and considers the detection and prevention of corrosion to underground pipes
- Addresses a lack of current, readily available information on the subject
- Case studies demonstrate how corrosion is managed in the underground pipeline industry

### **From reader reviews:**

#### **Kim Duncan:**

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite reserve and reading a guide. Beside you can solve your trouble; you can add your knowledge by the book entitled Underground Pipeline Corrosion (Series in Metals and Surface Engineering). Try to make book Underground Pipeline Corrosion (Series in Metals and Surface Engineering) as your buddy. It means that it can to get your friend when you experience alone and beside associated with course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you far more confidence because you can know every thing by the book. So , let us make new experience in addition to knowledge with this book.

#### **Thomas Woods:**

Playing with family within a park, coming to see the coastal world or hanging out with pals is thing that usually you will have done when you have spare time, and then why you don't try thing that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Underground Pipeline Corrosion (Series in Metals and Surface Engineering), you are able to enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh can happen its mind hangout guys. What? Still don't have it, oh come on its referred to as reading friends.

#### **Andrew Hall:**

Underground Pipeline Corrosion (Series in Metals and Surface Engineering) can be one of your basic books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in vocabulary, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to set every word into delight arrangement in writing Underground Pipeline Corrosion (Series in Metals and Surface Engineering) although doesn't forget the main point, giving the reader the hottest in addition to based confirm resource data that maybe you can be one among it. This great information can certainly drawn you into new stage of crucial considering.

#### **Mark Gibson:**

Your reading 6th sense will not betray anyone, why because this Underground Pipeline Corrosion (Series in Metals and Surface Engineering) publication written by well-known writer who knows well how to make book that may be understand by anyone who also read the book. Written in good manner for you, dripping every ideas and publishing skill only for eliminate your own hunger then you still hesitation Underground Pipeline Corrosion (Series in Metals and Surface Engineering) as good book not just by the cover but also by the content. This is one book that can break don't judge book by its deal with, so do you still needing yet another sixth sense to pick this particular!? Oh come on your reading sixth sense already told you so why

you have to listening to one more sixth sense.
