Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series)

Robert E. Schapire, Yoav Freund

Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series)

Robert E. Schapire, Yoav Freund

Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) Robert E. Schapire, Yoav Freund

Boosting is an approach to machine learning based on the idea of creating a highly accurate predictor by combining many weak and inaccurate "rules of thumb." A remarkably rich theory has evolved around boosting, with connections to a range of topics, including statistics, game theory, convex optimization, and information geometry. Boosting algorithms have also enjoyed practical success in such fields as biology, vision, and speech processing. At various times in its history, boosting has been perceived as mysterious, controversial, even paradoxical.

This book, written by the inventors of the method, brings together, organizes, simplifies, and substantially extends two decades of research on boosting, presenting both theory and applications in a way that is accessible to readers from diverse backgrounds while also providing an authoritative reference for advanced researchers. With its introductory treatment of all material and its inclusion of exercises in every chapter, the book is appropriate for course use as well. The book begins with a general introduction to machine learning algorithms and their analysis; then explores the core theory of boosting, especially its ability to generalize; examines some of the myriad other theoretical viewpoints that help to explain and understand boosting; provides practical extensions of boosting for more complex learning problems; and finally presents a number of advanced theoretical topics. Numerous applications and practical illustrations are offered throughout.

From reader reviews:

Virginia Hughes:

Hey guys, do you really wants to finds a new book to learn? May be the book with the name Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) suitable to you? The book was written by well-known writer in this era. The particular book untitled Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series)is the main one of several books that everyone read now. This particular book was inspired many men and women in the world. When you read this book you will enter the new dimensions that you ever know just before. The author explained their idea in the simple way, consequently all of people can easily to recognise the core of this publication. This book will give you a lots of information about this world now. In order to see the represented of the world within this book.

Dolores Rawson:

The e-book with title Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) contains a lot of information that you can learn it. You can get a lot of profit after read this book. That book exist new knowledge the information that exist in this e-book represented the condition of the world today. That is important to yo7u to know how the improvement of the world. This particular book will bring you throughout new era of the globalization. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Clarence Cavins:

This Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) is great guide for you because the content which is full of information for you who have always deal with world and still have to make decision every minute. This particular book reveal it details accurately using great plan word or we can claim no rambling sentences inside. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but difficult core information with splendid delivering sentences. Having Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) in your hand like getting the world in your arm, info in it is not ridiculous one. We can say that no guide that offer you world inside ten or fifteen tiny right but this publication already do that. So , it is good reading book. Hi Mr. and Mrs. stressful do you still doubt in which?

Shawn Mathison:

E-book is one of source of know-how. We can add our information from it. Not only for students but in addition native or citizen require book to know the change information of year to help year. As we know those guides have many advantages. Beside most of us add our knowledge, can bring us to around the world. By book Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) we can have more advantage. Don't one to be creative people? Being creative person must prefer to read a book.

Just simply choose the best book that acceptable with your aim. Don't be doubt to change your life at this book Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series). You can more inviting than now.
