Construction Research at NIOSH: Reviews of Research Programs of the National Institute for Occupational Safety and Health Institute of Medicine, National Research Council, Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Committee to Review the NIOSH Construction Research Program

The National Institute for Occupational Safety and Health (NIOSH) conducts construction-relevant research activities. From 1996 through 2005, the program focused on four research goals:

- reducing traumatic injuries and fatalities;
- reducing exposure to health hazards;
- reducing major risks associated with musculoskeletal disorders;
- increasing the understanding of construction industry attributes and factors for improving health and safety outcomes.

In this book, the National Research Council evaluates the relevance and impact of the NIOSH Construction Research Program in terms of its research priorities and its connection to improvements in the protection of workers in the workplace.

It also assesses the program's identification and targeting of new research areas, to identify emerging research issues, and to provide advice on ways that the program might be strengthened.

The book finds that the efforts of the Construction Research Program have made meaningful contributions to improving construction worker safety and health, and provides overarching and specific recommendations for continuing progress. While NIOSH cannot set and enforce research-based standards on its own, the program can be expected to help reduce construction workplace fatalities, injuries, and illnesses through its research, its research dissemination, and transfer into practice.

From reader reviews:

Arthur Atwood:

Within other case, little men and women like to read book Construction Research at NIOSH: Reviews of Research Programs of the National Institute for Occupational Safety and Health. You can choose the best book if you'd prefer reading a book. As long as we know about how is important a book Construction Research at NIOSH: Reviews of Research Programs of the National Institute for Occupational Safety and Health. You can add knowledge and of course you can around the world by just a book. Absolutely right, simply because from book you can recognize everything! From your country until finally foreign or abroad you will be known. About simple point until wonderful thing you could know that. In this era, we are able to open a book or perhaps searching by internet product. It is called e-book. You should use it when you feel fed up to go to the library. Let's learn.

Clara Reece:

Typically the book Construction Research at NIOSH: Reviews of Research Programs of the National Institute for Occupational Safety and Health has a lot info on it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. Mcdougal makes some research previous to write this book. This specific book very easy to read you can get the point easily after reading this book.

Mary Crist:

The book untitled Construction Research at NIOSH: Reviews of Research Programs of the National Institute for Occupational Safety and Health contain a lot of information on the idea. The writer explains her idea with easy means. The language is very easy to understand all the people, so do not necessarily worry, you can easy to read the item. The book was compiled by famous author. The author will take you in the new period of time of literary works. It is easy to read this book because you can please read on your smart phone, or product, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and also order it. Have a nice read.

Harry Anderson:

Don't be worry when you are afraid that this book will probably filled the space in your house, you can have it in e-book method, more simple and reachable. This Construction Research at NIOSH: Reviews of Research Programs of the National Institute for Occupational Safety and Health can give you a lot of good friends because by you taking a look at this one book you have factor that they don't and make you actually more like an interesting person. This specific book can be one of a step for you to get success. This guide offer you information that probably your friend doesn't learn, by knowing more than various other make you

to be great individuals. So , why hesitate? We should have Construction Research at NIOSH: Reviews of Research Programs of the National Institute for Occupational Safety and Health.
