Back Cover Text

Breast reconstructive and oncoplastic surgery can reduce the sense of mutilation resulting from oncologic surgery and meets the need to provide breast cancer treatment that will not only eradicate the cancer but also re-establish the patient's quality of life. However, the difficulties inherent in preoperative planning and the intraoperative complexity of breast reconstruction and oncoplastic techniques represent major challenges for the breast surgeon.

This atlas, intended for surgeons at every level, is an all-inclusive guide that documents surgical techniques step by step by means of a wealth of more than 1800 color photos, additional high-quality drawings and illustrations, and succinct accompanying text. Both common, established procedures and the most recently introduced techniques are covered, ensuring that readers will have at their disposal multiple approaches for breast repair, remodeling, and reconstruction. In addition to the comprehensive descriptions of techniques, preoperative planning is explained, indications and contraindications are identified, and the management of surgical complications is discussed. Tips, pitfalls, and key points are highlighted.

The *Atlas of Breast Reconstruction* is an unprecedented tool that will increase and refine the arsenal at the oncoplastic surgeon's disposal in order to ensure that the best treatment can be offered to each individual patient.
