Robert E. Schapire, Yoav Freund

Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) Robert E. Schapire, Yoav Freund

Boosting is an approach to machine learning based on the idea of creating a highly accurate predictor by combining many weak and inaccurate "rules of thumb." A remarkably rich theory has evolved around boosting, with connections to a range of topics, including statistics, game theory, convex optimization, and information geometry. Boosting algorithms have also enjoyed practical success in such fields as biology, vision, and speech processing. At various times in its history, boosting has been perceived as mysterious, controversial, even paradoxical. This book, written by the inventors of the method, brings together, organizes, simplifies, and substantially extends two decades of research on boosting, presenting both theory and applications in a way that is accessible to readers from diverse backgrounds while also providing an authoritative reference for advanced researchers. With its introductory treatment of all material and its inclusion of exercises in every chapter, the book is appropriate for course use as well. The book begins with a general introduction to machine learning algorithms and their analysis; then explores the core theory of boosting, especially its ability to generalize; examines some of the myriad other theoretical viewpoints that help to explain and understand boosting; provides practical extensions of boosting for more complex learning problems; and finally presents a number of advanced theoretical topics. Numerous applications and practical illustrations are offered throughout.

From reader reviews:

Michael Gibson:

Have you spare time for the day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a wander, shopping, or went to the particular Mall. How about open or perhaps read a book titled Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series)? Maybe it is to become best activity for you. You know beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have different opinion?

Mario Berry:

The book Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) gives you the sense of being enjoy for your spare time. You need to use to make your capable far more increase. Book can to be your best friend when you getting strain or having big problem with the subject. If you can make examining a book Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) for being your habit, you can get considerably more advantages, like add your capable, increase your knowledge about a number of or all subjects. You could know everything if you like available and read a reserve Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series). Kinds of book are a lot of. It means that, science e-book or encyclopedia or other individuals. So , how do you think about this reserve?

Peggy Gillman:

The guide with title Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) has a lot of information that you can learn it. You can get a lot of advantage after read this book. This specific book exist new knowledge the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This book will bring you in new era of the internationalization. You can read the e-book on the smart phone, so you can read that anywhere you want.

Ella Hodge:

As we know that book is vital thing to add our knowledge for everything. By a publication we can know everything we really wish for. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This book Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) was filled with regards to science. Spend your free time to add your knowledge about your scientific research competence. Some people has different feel when they reading a book. If you know how big benefit of a book, you can feel enjoy to read a book. In the modern era like right now, many ways to get book that you just wanted.
