Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22

Ales Pultr, Vera Trnkova

Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22 Ales Pultr, Vera Trnkova

This book provides a comprehensive introduction to modern global variational theory on fibred spaces. It is based on differentiation and integration theory of differential forms on smooth manifolds, and on the concepts of global analysis and geometry such as jet prolongations of manifolds, mappings, and Lie groups.

The book will be invaluable for researchers and PhD students in differential geometry, global analysis, differential equations on manifolds, and mathematical physics, and for the readers who wish to undertake further rigorous study in this broad interdisciplinary field.

Featured topics

- Analysis on manifolds
- Differential forms on jet spaces
- Global variational functionals
- Euler-Lagrange mapping
- Helmholtz form and the inverse problem
- Symmetries and the Noether's theory of conservation laws
- Regularity and the Hamilton theory
- Variational sequences
- Differential invariants and natural variational principles

- First book on the geometric foundations of Lagrange structures
- New ideas on global variational functionals
- Complete proofs of all theorems
- Exact treatment of variational principles in field theory, inc. general relativity
- Basic structures and tools: global analysis, smooth manifolds, fibred spaces

From reader reviews:

Lisa Shumaker:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to be aware of everything in the world. Each reserve has different aim or maybe goal; it means that e-book has different type. Some people sense enjoy to spend their time for you to read a book. They are reading whatever they consider because their hobby is reading a book. Think about the person who don't like examining a book? Sometime, man feel need book if they found difficult problem or exercise. Well, probably you'll have this Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22.

Young Legg:

Book is usually written, printed, or outlined for everything. You can know everything you want by a publication. Book has a different type. To be sure that book is important thing to bring us around the world. Next to that you can your reading expertise was fluently. A e-book Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22 will make you to be smarter. You can feel a lot more confidence if you can know about anything. But some of you think that open or reading any book make you bored. It is far from make you fun. Why they are often thought like that? Have you in search of best book or appropriate book with you?

Walter Pressley:

The book Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22 will bring you to definitely the new experience of reading a book. The author style to explain the idea is very unique. If you try to find new book to study, this book very ideal to you. The book Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22 is much recommended to you to study. You can also get the e-book from the official web site, so you can quicker to read the book.

Clement Williams:

Don't be worry if you are afraid that this book may filled the space in your house, you could have it in e-book technique, more simple and reachable. That Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22 can give you a lot of close friends because by you checking out this one book you have matter that they don't and make a person more like an interesting person. This specific book can be one of a step for you to get success. This reserve offer you information that maybe your friend doesn't know, by knowing more than additional make you to be great men and women. So , why hesitate? Let us have Combinatorial, Algebraic and Topological Representations of Groups, Semigroups and Categories, Volume 22.
