Deformed Spacetime: Geometrizing Interactions in Four and Five Dimensions (Fundamental Theories of Physics) Fabio Cardone, Roberto Mignani

This volume provides a detailed discussion of the mathematical aspects and physical applications of a new geometrical structure of space-time, based on a generalization ("deformation") of the usual Minkowski space, as supposed to be endowed with a metric whose coefficients depend on the energy. This new five-dimensional scheme (Deformed Relativity in Five Dimensions, DR5) represents a true generalization of the usual Kaluza-Klein (KK) formalism.

From reader reviews:

Christine Frazier:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each publication has different aim or goal; it means that guide has different type. Some people really feel enjoy to spend their time and energy to read a book. They can be reading whatever they consider because their hobby is definitely reading a book. Think about the person who don't like examining a book? Sometime, individual feel need book when they found difficult problem or perhaps exercise. Well, probably you'll have this Deformed Spacetime: Geometrizing Interactions in Four and Five Dimensions (Fundamental Theories of Physics).

Regina Rodgers:

The particular book Deformed Spacetime: Geometrizing Interactions in Four and Five Dimensions (Fundamental Theories of Physics) will bring one to the new experience of reading a new book. The author style to spell out the idea is very unique. If you try to find new book to study, this book very appropriate to you. The book Deformed Spacetime: Geometrizing Interactions in Four and Five Dimensions (Fundamental Theories of Physics) is much recommended to you to see. You can also get the e-book through the official web site, so you can quicker to read the book.

Theresa Frost:

Do you like reading a book? Confuse to looking for your favorite book? Or your book has been rare? Why so many problem for the book? But any kind of people feel that they enjoy for reading. Some people likes looking at, not only science book but in addition novel and Deformed Spacetime: Geometrizing Interactions in Four and Five Dimensions (Fundamental Theories of Physics) or even others sources were given know-how for you. After you know how the great a book, you feel need to read more and more. Science publication was created for teacher or students especially. Those books are helping them to bring their knowledge. In different case, beside science book, any other book likes Deformed Spacetime: Geometrizing Interactions in Four and Five Dimensions (Fundamental Theories of Physics) to make your spare time considerably more colorful. Many types of book like here.

Sharonda Adair:

As a college student exactly feel bored to help reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that studying is not important, boring as well as can't see colorful photos on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Deformed Spacetime: Geometrizing Interactions in Four and Five

Dimensions (Fundamental Theories of Physics) can make you sense more interested to read.
