Non-Euclidean Geometries: János Bolyai Memorial Volume (Mathematics and Its Applications)

"From nothing I have created a new different world," wrote János Bolyai to his father, Wolfgang Bolyai, on November 3, 1823, to let him know his discovery of non-Euclidean geometry, as we call it today. The results of Bolyai and the co-discoverer, the Russian Lobachevskii, changed the course of mathematics, opened the way for modern physical theories of the twentieth century, and had an impact on the history of human culture.

The papers in this volume, which commemorates the 200th anniversary of the birth of János Bolyai, were written by leading scientists of non-Euclidean geometry, its history, and its applications. Some of the papers present new discoveries about the life and works of János Bolyai and the history of non-Euclidean geometry, others deal with geometrical axiomatics; polyhedra; fractals; hyperbolic, Riemannian and discrete geometry; tilings; visualization; and applications in physics.

From reader reviews:

Irma Patterson:

What do you concerning book? It is not important together with you? Or just adding material when you want something to explain what the one you have problem? How about your extra time? Or are you busy person? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every individual has many questions above. They should answer that question mainly because just their can do this. It said that about guide. Book is familiar in each person. Yes, it is suitable. Because start from on jardín de infancia until university need this specific Non-Euclidean Geometries: János Bolyai Memorial Volume (Mathematics and Its Applications) to read.

Brian Pena:

Now a day individuals who Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not require people to be aware of each information they get. How many people to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Studying a book can help men and women out of this uncertainty Information mainly this Non-Euclidean Geometries: János Bolyai Memorial Volume (Mathematics and Its Applications) book as this book offers you rich information and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it you may already know.

Dolores Albert:

That book can make you to feel relax. This specific book Non-Euclidean Geometries: János Bolyai Memorial Volume (Mathematics and Its Applications) was bright colored and of course has pictures around. As we know that book Non-Euclidean Geometries: János Bolyai Memorial Volume (Mathematics and Its Applications) has many kinds or variety. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and think that you are the character on there. Therefore , not at all of book usually are make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading this.

Carl Terrell:

A lot of guide has printed but it differs from the others. You can get it by internet on social media. You can choose the very best book for you, science, witty, novel, or whatever by searching from it. It is known as of book Non-Euclidean Geometries: János Bolyai Memorial Volume (Mathematics and Its Applications). You'll be able to your knowledge by it. Without departing the printed book, it could possibly add your knowledge and make a person happier to read. It is most crucial that, you must aware about reserve. It can bring you from one destination to other place.
